***Acknowledgement***

Receipt is acknowledged of the Amendment filed January 6, 2004.

***Reasons for Allowance***

Claims 1-6, 8-15, and 17-28 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Asano et al., taken alone or in combination of other references, does not teach or fairly suggest an integrated circuit comprising, among other things, a digital encoder circuit coupled to receive the  $2^N$  output signals of the comparators, the digital encoder circuit encoding the  $2^N$  output signals of the comparators into N digital signals that represent an N-bit binary value, the binary value indicating how many of the  $2^N$  output signals of the comparators are HIGH, as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
